(54) RADIATION SENSITIVE RESIN COMPOSITION

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a positive or negative radiation sensitive resin compsn. useful as a chemical amplification resist which ensures especially low edge roughness in a fine pattern of $\leq 0.2 \mu\text{m}$ and has high sensitivity and high resolution.

SOLUTION: The positive radiation sensitive resin compsn. contains a fullerene deriv. soluble in a solvent for a resist, a radiation sensitive acid generating agent and an acid dissociable group-contg. resin or an alkali-soluble resin and an alkali solubility controlling agent. The negative radiation sensitive resin compsn. contains the fullerene deriv., the radiation sensitive acid generating agent, an alkali-soluble resin and a compd. capable of crosslinking the alkali-soluble resin in the presence of an acid.

LEGAL STATUS

[Date of request for examination] 27.09.2002

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3521710
